DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-12 are rejected under 35 U.S.C. 102(b) as being anticipated by Ismail (US 4,362,905).

Ismail discloses an adapter comprising a housing (44) that defines an interior region and an exterior region, the housing having an entrance face (50); a plurality of electrical conductors (see fig.6) extending into the interior region of the adapter; a plug connector (46) coupled to a first subset of the electrical conductors; and a receptacle connector (56) coupled to a second subset of the electrical conductors. Ismail also discloses a data terminal (58) coupled to a third subset. Ismail also shows a plug face, a receptacle face and a terminal face.

Claims 13 and 14 are rejected under 35 U.S.C. 102(b) as being anticipated by Bell (US 5,930,340).

Bell discloses an interface adapter comprising an ASDL filter; a plug connector (309) coupled to the filter by a first set of electrical conductors; and a receptacle connector (305) coupled to the filter by a second set of electrical conductors. Bell also discloses a data terminal (307) coupled to the filter by a third set of electrical conductors.

Response to Arguments

Applicant's arguments filed 05/22/02 have been fully considered but they are not persuasive.

In response to applicant's arguments that Ismail does not disclose or suggest "a plurality of electrical conductors extending into the interior region of the adapter through the entrance face of the housing", please note that the entrance face (50) as defined by Ismail require a plurality of electrical conductors extending into the interior region of the adapter in order to provide an electrical connection between the first subset of electrical conductors and a mating plug. Therefore, the limitation "a plurality of electrical conductors extending into the interior region of the adapter through the entrance face of the housing" is inherent in the structure of Ismail.

In response to applicant's arguments regarding claim 2, please note that a data must be transmitted in order to be recorded.

In response to applicant's arguments regarding claims 13 and 14, please note that Fig. 3 of Bell shows a plug connector and the receptacle connector electrically coupled to the same filter.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not

Art Unit: 2833

mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
